PRODUCT SUBMITTAL Matterhorn 1000

APPLICATION

The Matterhorn 1000 ionization system is intended to be mounted in the supply duct or air handler of a heating, cooling, or ventilating system. The unit is intended to operate only when air flow is present, thus, power to the ionization unit should be interlocked with fan operation, or controlled via an air pressure switch. The size and number of ionization systems is dependent upon the airflow, size of the space, and severity of the pollution and odors. Ionization can be adjusted with a knob.

Optional/Available:

- Air Switch
- Mounting Bracket
- Remote Monitoring Panel

Figure 2atic Pressure Drop was calculated at 1,500 fr/min (7.62 m/s) airflow velocity.
